

Freedom on the Wings of a Private Jet

By **Grandmagazine** - 30. November 2019

Falcon 7X

For many people, private flying is the only way to handle more things at once: their careers, families, or hobbies. It is also an incredible feeling of freedom and the opportunity to fully enjoy every minute.

Imagine that you are at a meeting in Bratislava and suddenly you want to go skiing in the Italian Dolomites. Just call WAPE JETS and arrive fifteen minutes before departure to the airport. This is how the founder of WAPE JETS, Zuzana Petáková, describes the benefits of traveling by private jet.

PhDr. Zuzana Petáková

What do you think are the advantages of a private aircraft?

The company's priorities are based on four pillars: security, confidentiality, flexibility, and individual approach.

The most important would be flexibility and a high degree of confidentiality. The efficient use of this type of flying will save you a lot of time. It is the entrepreneurs that fancy such an idea. At the same time, the cost of hiring an aircraft is, in some cases, comparable to the price of a business class ticket, but the services provided are vastly different. In addition, each flight is handled individually, from flight planning to on-board catering.

Everything is prepared so that the client is satisfied and the services provided meet his needs. We know well the requirements and routines of clients who regularly fly with us, which enables us to provide even better service and thus simplifies the entire booking process. We really pamper our clients.

Where can the client learn about the offers so he can opt for the WAPE JETS?

There are several ways, and the process is very simple. You can call us, and we explain to you the requirements, and we can make a non-binding calculation, or you can fill out the form on our website. The basic information we need is your origin and destination of the flight, the date, and the number of passengers. These factors influence the price the most because we use them to choose the most suitable aircraft type. Basically, the aircraft can then be prepared within 3 hours of flight confirmation.

What would you recommend to the client, and what is it like?

Private aviation is amazing because the customer does not need to take care of anything. The plane is waiting for you, not the other way around. All you need to do is arrive at the airport 15 minutes before departure, where a crew waits in the departure hall to help the client with the luggage and escort him through the security check to the plane that will depart within a few minutes. The experienced staff takes care of the client on board, and VIP catering is a matter, of course. When you arrive at your destination, you are taken over by another team, who will take you along with the luggage to the terminal. Then you can follow your plan. If the client wishes, e.g., arrange transportation from the airport to the hotel, we will also provide this service.

What trips do clients most often use a business jet for?

PhDr. Zuzana Petáková

I can say that business people fly with us the most, because they appreciate high flexibility, saving their precious time and last but not least provided service from

ordering flight through comfort while onboard. Imagine that your Meeting has been prolonged. Usually, you would have to buy a new ticket and wait until morning, which means, among other things, additional hotel costs. With us, just a phone call and you need to move the flight to another hour, and our team will take care of everything. The plane is waiting for you, not you for the plane. A private plane also has other advantages. Traditional airlines are limited to an airport where large planes can land. Thanks to its size, the jet will land at smaller airports. So that you are as close as possible to your destination. In addition, you have no worries about any loss of luggage.

What is the price range for your services?

In our country and Central Europe in general, we will still often hear that flying by private jet is above standard and especially for the wealthiest people. At the same time, a private plane flight can be

very close to a business class ticket with a traditional airline. If you compare price, time savings, or the fact that you are not limited by departure times and efficiency, everything is set. I am really looking forward to the end of these myths, and people will consider private aviation standard transport.

ABOUT WAPE JETS:

WAPE JETS is one of the few private air transport companies in the Czech Republic and Slovakia that provides a great range of services and solutions in the industry.

Private flight brokerage, aircraft purchase, or industry consultancy has been in the company's portfolio for many years. The foundation of the company consists of a professional and individual approach to each client, based on the personal experience of flying private aircraft, cooperation with aircraft manufacturers, and exclusive brands. The company's priorities are based on four pillars: security, confidentiality, flexibility, and individual approach.

PROFIL: PhDr. Zuzana Petáková

She is the founder of WAPE JETS, which specializes in private aviation, especially in the field of rental and sale of private aircraft. She started her career in private aviation, where she focused mainly on aircraft sales, marketing, and brand communication in the international arena. Later, she expanded her experience to include the segment of world-renowned luxury and premium brands. Zuzana does

not deny her passion for languages and traveling. She speaks English, French, and Russian and has traveled the world over the past eight years. In the past, she also worked in diplomatic spheres and as a spokesperson. Security and client satisfaction are her priorities.
